Subject: Microsoft Settlement

The government NEVER should have gone after Microsoft in the first place a travesty of justice that we believe was instigated by Clinton at the behest of his campaign contributors who were Microsoft s competitors. The war against Microsoft certainly hasn t helped consumers or investors and it started the market and economy downturn. Far better had the government gone after criminal activities and accounting malpractices in the ENRON debacle. The Microsoft settlement was fair. Let the settlement stand and put an end to this madness.
